Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant would file an amendment and arguments as to how the pressure in the recirculation path could be greater than the pressure in the dispensing path as the valve in the dispensing module moves from the open to the close position. Claim 17 requires the check vale to be in the dispensing module; however, the Akers reference shows the check valve in recirculation path of the manifold.
